HOW TO INTERPRET THE REPORT?

This assessment provides insights into an individual’s alignment towards different technology areas and their readiness for technology-specific learning pathways.

The final technology scores are derived using:

- responses to interest-based statements, which help understand alignment towards broader technology areas, and
- skill readiness across key technical skill areas relevant to different technologies.

These components are combined to provide an overall readiness indication for each technology pathway.

Technology Scores

Each technology score reflects the individual’s current alignment and readiness for learning and working within that technology area.

Scores are categorized into:

Foundational (0–30): Indicates emerging readiness for the technology. Individuals at this level may benefit from strengthening foundational concepts and exploring introductory learning pathways before progressing further.

Intermediate (31–70):

Indicates functional readiness for the technology. Individuals at this level are likely to adapt well to structured learning pathways and applied technology environments within the domain.

Advanced (71–100):

Indicates strong readiness for the technology. Individuals at this level are likely to demonstrate stronger alignment towards the domain and may adapt effectively to more advanced learning pathways and technology applications.

Technology Pathway Recommendations Based on the overall technology scores, the report provides:

- indicative roles and occupations
- learning pathway recommendations

These recommendations are intended to support exploration and development within relevant technology areas.

The scores are intended to indicate current alignment and readiness, and should not be interpreted as a measure of overall capability or long-term potential. The accuracy of the results depends on the participant’s responses during the assessment.

Values shown in above chart are percentages

Foundational (0 - 30) Intermediate (31 - 70) Advanced (71 - 100)

Technology Pathway Alignment

Blockchain

Shows interest towards secure digital transactions, structured digital systems, and validation-oriented technology environments. Demonstrates emerging readiness and may benefit from building stronger readiness before progressing into blockchain learning pathways involving decentralized systems and secure digital operations.

Relevant roles in this technology area include: Blockchain Developer, Blockchain Engineer, Smart Contract Developer, Distributed Systems Engineer, Blockchain Solutions Analyst.

Course recommendations on Blockchain for the current readiness level:

[Blockchain and IoT](#)

Cloud Computing

Shows interest towards interconnected digital systems, scalable platforms, and infrastructure-oriented technology environments. Demonstrates emerging readiness and may benefit from building stronger readiness before progressing into cloud-focused learning pathways involving digital infrastructure and platform-based services.

Relevant roles in this technology area include: Cloud Engineer, Cloud Administrator, Infrastructure Engineer, Platform Engineer, Cloud Solutions Engineer, DevOps Engineer.

Course recommendations on Cloud Computing for the current readiness level:

[AWS Cloud Practitioner](#)

[AWS Cloud Masterclass](#)

Cybersecurity

Shows interest towards secure digital operations, system reliability, and protection-oriented technology environments. Demonstrates emerging readiness and may benefit from strengthening readiness before progressing into cybersecurity learning pathways involving secure systems and digital risk management.

Relevant roles in this technology area include: Cybersecurity Analyst, Security Engineer, Information Security Analyst, SOC Analyst, Risk & Compliance Analyst, Security Operations Specialist.

Course recommendations on Cybersecurity for the current readiness level:

[Cybersecurity](#)

[Introduction to Cybersecurity and Getting Started with Cisco Packet Tracer](#)

[Cybersecurity Fluency 101](#)

Robotic Process Automation

Shows interest towards structured workflows, operational efficiency, and automation-oriented environments. Demonstrates emerging readiness and may benefit from strengthening readiness before progressing into learning pathways involving workflow automation and process optimization technologies.

Relevant roles in this technology area include: RPA Developer, Automation Engineer, Process Automation Analyst, Workflow Automation Specialist, Operations Automation Engineer.

Course recommendations on RPA for the current readiness level:

[Trubot Designer](#)

Web, Mobile Development & Digital Marketing

Shows interest towards digital interactions, user engagement, and experience-oriented technology environments. Demonstrates emerging readiness and may benefit from building stronger readiness before progressing into web, mobile, and digital engagement learning pathways.

Relevant roles in this technology area include: Web Developer, Mobile Application Developer, Front-End Developer, UI Developer, Digital Marketing Specialist, User Engagement Specialist.

Course recommendations on Web, Mobile Development & Marketing for the current readiness level:

- [Digital Edge](#)
- [Digital Engineering](#)
- [Python Fundamentals](#)
- [Python Developer](#)
- [React JS](#)
- [Emerging Technologies in Finance](#)

This Report is generated electronically on the basis of the inputs received from the assessment takers. This Report including the AI flags that are generated in case of availing of proctoring services, should not be solely used/relied on for making any business, selection, entrance, or employment-related decisions. Mettl accepts no liability from the use of or any action taken or refrained from or for any and all business decisions taken as a result of or reliance upon anything, including, without limitation, information, advice, or AI flags contained in this Report or sources of information used or referred to in this Report.
